Answers

- 1) Mary left home with \$ 1000 and spent \$ 550 at a jewel shop. With how much money did she return ?

$$1000 - 550 = 450$$

- 2) Carol on her way to school misplaced \$12.
If she initially had \$ 20, how much is she left with ?

$$20 - 12 = 8$$

- 3) An apple tree has 100 fruits, 20 are ripe and the rest are unripe. How many unripe fruits are on the tree ?

$$100 - 20 = 80$$

- 4) The kids corner usually has 120 visitors per day but today only 50 visitors came in. How many visitors were absent ?

$$120 - 50 = 70$$

- 5) John was asked to tell the number of days in a year and without thinking carefully he said 'there are 200 days in a year'. By how many days does his answer fall short of ?

$$364 - 200 = 164$$
